In the early 1970's, Peter had a series of visions about the physical status of the Earth and the probable futures of its human inhabitants. By far, his most puzzling was his vision of an event shortly after the beginning of the new millennium (2012) that would not only mark the end of history, but in which time itself ceased to be. He was shown that it was not the destruction of the world he was witnessing, but the end of life as we know it. Peter states that, unlike the predictions about the turn of the millennium, this event is very real and has to be reckoned with, for you are hear and now.

Peter will discuss his visions of the future in light of the different theories of what the Mayan Calendar date of 2012 means, how we can prepare for this event of 2012, and what we can expect in the next three years and beyond. You will learn about the meaning of the Mayan Calendar date of 2012; the amazing 2000-year-old prophecies of the Quetzalcotl; the Photon Belt; the Alcyone Spiral; a possible splitting of reality; the end of time, the "days of darkness," and more.

Peter will share with us, how we as shamans can have an influence on these events and survive.
